## Projects

---

### Responsive Resume Website

Project Description

- The Responsive Resume CV Website project is a polished platform crafted with HTML, CSS, and JavaScript, offering Light and Dark theme options for personalization.
- It features a responsive design for seamless viewing across devices and includes a PDF export functionality for easy sharing of professional credentials.
- Users can showcase their education, work experience, skills, and achievements in a visually appealing and user-friendly format.

### Digital Certificate Generation

Project Description

- The Digital Certificate Generation system excels in online certificate creation.
- It establishes a robust, bidirectional communication platform between the Student and Institute Portals.
- Empowering students to request, track, and print certificates, while granting the Institute the authority to approve, generate, and meticulously manage certificate data.
