Swamy D

Software Engineer

Phone no : 8341590625

Email: swamyd.0625@gmail.com **Hyderabad, Telangana**

PROFESSIONAL SYNOPSIS

- Full Stack Developer with 4+ years of experience building scalable web applications using React.js, Angular, Node.js, and Express.js, with exposure to cloud and DevOps practices on AWS.
- Experienced in SDLC phases, including development, testing, and deployment in Agile/Scrum environments.
- Strong expertise in React.js (Hooks, Context API, Redux) for building performant and reusable UI components.
- Working experience in developing RESTful APIs using Node.js and Express.js and integrating with frontend applications.
- Experience with MySQL for data storage and retrieval.
- Familiar with AWS services (EC2, S3, IAM) and CI/CD pipelines using Jenkins.
- Hands-on exposure to Docker (ECR) and basic knowledge of Kubernetes (EKS).
- Proficient in HTML5, CSS3, SASS/SCSS, and Git for version control.

EMPLOYMENT HISTORY

- Working as a Software Engineer for Deloitte since Jan 2022 to present.

TECHNICAL STACK

Frontend: React.js, Angular, JavaScript (ES6+), HTML5, CSS3

Backend: Node.js, Express.js

Database: MySQL

Cloud: AWS (EC2, S3, IAM, ECR, EKS)

DevOps&CI/CD: Jenkins, Docker, Kubernetes

Tools&Workflow: Git, GitHub, Postman, Jira, Agile/Scrum

Architecture: REST API

PROJECT DETAILS

CareFirst BlueCross BlueShield

CareFirst BlueCross BlueShield, a leading health insurance provider serving over 3.5 million members across Maryland, Washington D.C , and Baltimore, initiated a project to modernize the **Broker and Employer modules** for critical health insurance workflows.

- **Broker Module:** Designed to help brokers manage client enrollments, open enrollment processes, and policy administration through dedicated portals.
- **Employer Module:** Enables employers to manage health plan enrollments, claims invoicing, life & disability policies, and generate Stoploss reports via the Employer, Employer LG, and Employer Admin portals.

Roles and Responsibilities:

- Designed and implemented modular, reusable React components, streamlining development and ensuring consistency across portals.
- Developed responsive, user-friendly interfaces using React.js, Redux, and Angular, improving usability across Broker and Employer modules.
- Integrated RESTful APIs with optimized data handling and lazy loading techniques, enhancing performance and responsiveness.
- Implemented various workflows, including Open Enrollment, Claims Invoice generation, and Stoploss reporting, using reusable React components.
- Collaborated with backend teams to ensure seamless API integration and workflow execution.
- Enhanced reliability by debugging and resolving UI defects with Jest and applying best practices in error handling.
- Improved user experience (UX) through intuitive design and efficient front-end data management.
- Actively contributed to Agile ceremonies, managing tasks in Jira for iterative, on-time delivery.

EDUCATION

B.Tech in Computer Science

MALLA REDDY COLLEGE OF ENGINEERING | JNTUH

Hyderabad, Telangana.
